CAREER OBJECTIVES

As a full-stack web developer with expertise in HTML, CSS, Bootstrap, Tailwind CSS, JavaScript, React.js, Redux.js, and MongoDB. With a passion for staying current on industry trends and technologies, I can bring a unique perspective to every project I work on.

SKILLS

Expertise: HTML5 | CSS3 | Bootstrap | TailwindCSS | JavaScript ES6 | React.js | DaisyUI | Material UI | Flowbite | Firebase Authentication | Git and GitHub

Comfortable: Node.js and Express.js | Redux | Rest API | Devtools and Debugging | MongoDB | React Query | Axios | JWT | React Hook Form

Familiar: Styled Component | Stripe | SSL Commerz | TypeScript | Next.js | ThreeJS | GraphQL

Tools: MacOS | Windows | VS Code | Netlify | Vercel | Firebase | Dotenv | Figma | Canva | Adobe XD | Photoshop | Chrome Dev Tools

PROJECTS

CARA (E- Commerce)   Live Website | Server Site GitHUB | Client Site GitHUB

Technologies Used: React.js, TailwindCSS, DaisyUI, Firebase Authentication, Local Storage, Session storage, React Router.

- This is an online clothing store where users can select the products, quantity, and sizes.
- User can use the payment option if only they are logged in. JWT token is used for data protection.
- Generated data is integrated with backend. Stripe payment method implemented.

KIDDO (Online Toy Store)   Live Website | Server Site GitHUB | Client Site GitHUB

Technologies Used: React.js, TailwindCSS, DaisyUI, Firebase Authentication, Local Storage, Session storage, React Router, Node.js and Express.js, MongoDB.

- This is an online toy store where users as in sellers can add, delete, edit the products on their stores.
- Website is responsive for mobile, laptop and desktop. All the generated data is integrated with backend.

CUISINE (Chefs information)   Live Website | Server Site GitHUB | Client Site GitHUB

Technologies Used: React.js, TailwindCSS, DaisyUI, Firebase Authentication, Local Storage, Session storage, React Router, Node.js and Express.js, MongoDB.

- A chef can add, delete, edit his recipes and information.
- A user can only view the recipes and information of the chefs when they are logged in.
- Website is responsive for mobile, laptop and desktop. All the generated data is integrated with backend.
